MINI DRAG BOX

The Mini Drag Box provides a safe working area for pipe laying operations. The complete unit can be easily handled using on-site machinery and this coupled with the elimination of threaded components and pinned assembly can offer considerable site cost savings. Drag Boxes can be stacked using connecting plates and pins to accommodate deeper excavations.

Useful Data

SWL of 20 kN/m².

Panels are 3m long x 2m deep

Weight per Complete Drag Box: 1350kg

950mm clearance below bottom strut

Internal Width range: 600mm to 1000mm

Panel thickness: 75mm

Safety First!

We also offer for hire, edge protection barrier system to eliminate the risk of anyone from falling into an open excavation. Please contact your local depot for further information on this product.
